

TASER Selects CIMTEK's Outsourced Test Engineering Service to Ensure Rapid Time to Market for New Products

Combining CIMTEK Test Engineering Services with functional test systems and Magellon software, provides real-time product quality management and comprehensive product insight to TASER

Needham, MA and Scottsdale, AZ, April 28, 2010 —[CIMTEK](#) today announced the signing of an [outsourced test engineering](#) agreement with [TASER International](#). TASER selected CIMTEK's test engineering Professional Services solutions for managing and tracking the quality of its rapidly expanding TASER® brand Electronic Control Devices, AXON™ wireless on-officer video, and advanced tactical computer product lines.

“Managing risk, while rapidly expanding our product lines requires TASER to continue to enhance product quality management. Partnering with CIMTEK demonstrates our commitment to rapid repeatable product launches,” said Dr. Mark Phelps Vice President of Engineering at TASER. “With innovative products, more sophisticated manufacturing lines, and increased production volumes, controlling product quality is a critical business activity. CIMTEK provides comprehensive insight and action throughout every phase of our products’ life cycle.”

Stan Smith, president and CEO of CIMTEK said, “It is exciting to see that prominent companies such as TASER recognize that outsourced test engineering solutions are imperative to their businesses in today’s economic environment. Outsourced services enable electronics manufacturers to focus on their core competencies and adopt a variable cost model that can ebb and flow with product launch activities. We are pleased that global manufacturers with personal safety-critical products chose CIMTEK to improve product quality, increase customer satisfaction while reducing scrap and costs.”

TASER will use CIMTEK Professional Services, [functional test systems](#) and [Magellon](#) product quality management software to provide onsite test engineering solutions that provide rapid closed loop analysis and corrective actions on a global scale to increase quality and efficiencies throughout the TASER product life cycle.
